

FOR IMMEDIATE RELEASE

11 March 2008

THALASSA ENERGY LTD

BOARD APPOINTMENT

Thalassa Energy Ltd. ("TEL" or "the Company"), a company formed to exploit niche market, high value oil and gas exploration, and reservoir monitoring operations around the world, is pleased to announce that David Thomas, former Managing Director of MedOil PLC, has agreed to join the Board of the Company with immediate effect.

Mr. Thomas is a geologist with 35 years experience in the oil and gas industry, mainly in North and West Africa. Mr. Thomas served most recently as Managing Director of MedOil PLC, a position he held for three years until the successful sale of the Company to Cairn Energy in the fourth quarter of 2007.

After five years of working in SE Asia and then in London for North Sea operations, he spent the late 1970s and early 1980s working in Libya for Occidental Petroleum, and then in Tunisia for Tenneco. A return to London as International Chief Geologist for the Kuwait Petroleum Corporation gave David the opportunity to develop his technical management skills and establish a broad international contact network.

David has considerable experience in identifying and evaluating new business opportunities worldwide, as well as managing day-to-day operational activities.

Duncan Soukup, Chairman of TEL said, **"I am very pleased that David has agreed to join the board of TEL. The Company is currently preparing to list on the AIM market and David's addition to the Board gives the Company access to industry experience which should complement the financial strengths of the other Board members."**

Commenting on his appointment David Thomas said, **"I am delighted to be joining the Board of TEL. The acquisition of MedOil by Cairn Energy is now complete and I am free to explore other opportunities. I am looking forward to working with Duncan and the people at WGP, TEL's operations partner. There is no doubt in my mind that there is room in the energy industry for a focused, niche participant and I am excited at the opportunity to help TEL grow from the ground up."**
